

M+ PANDA

Circular design

Modular components are designed for complete reuse.

Glue-free upholstery

Based on patented upholstery technology.

Complete design freedom

In terms of dimensions, upholstery and optional colour of the solid bamboo frame.

Sustainably produced in the Netherlands

Energy-neutral factory in collaboration with mostly local suppliers and products.

We mainly know the panda as the symbol of the WWF or as Fiat's compact car. Now Moduplus also has its own Panda. Not for shopping, but to give your interior an upgrade. The Panda from the M+ collection is our compact all-rounder that fits in anywhere.

Why? For example, because it is made from bamboo grass. The solid **bamboo** we use is extremely strong, grows quickly (up to 1 metre per day) and retains its flexibility. As it grows, bamboo purifies so much CO₂ s from the air that even after production and transport, more CO₂ s have been absorbed than produced.

And then, of course, there is the name: the way the back cushion is attached to the frame gives the chair its distinctive look. Bear in mind that we used bamboo as the starting point for our design, so the link to pandas is obvious. This also gave us the idea of **donating 1% of the proceeds from every chair sold to a charity that is committed to improving the climate**. Not as compensation, but because we believe it is important to be aware of our impact on the planet and want to make a positive contribution.

We can be brief about the chair: it is extremely comfortable. We complete all parts of our Panda with **durable upholstery** in-house. The entire design, like all other Moduplus products, is modular. Almost all parts can be sustainably dismantled and are therefore perfectly suited for **reuse**. The M+Panda is available in various versions: as a chair, bench, stool and high bench. Ideal for a standing table or company bar, for example on a Friday afternoon. In short: you'll score points with the versatile M+ Panda.
