

## Nis benches

ROFA's comfortable Nis benches give a room a designer look while also improving the acoustics. All benches are upholstered to a high standard and filled with high-quality cold foam.

The Nis bench is 135 cm high and has an extra stitching seam in the back. The frame is constructed from sustainably certified wood, plywood and MDF; the seat has Nosag springs for a longer lifespan and excellent seating comfort. When you place two Nis benches opposite each other, we can hang a partition between them. You can also hang a television on it if you wish. This creates a small meeting room. It is also possible to attach a small table with electrical outlets to the partition.

### Specifications
