

# Grandstand seating elements

To come up with good ideas, you need an interior that stimulates your senses and sparks your creativity. This calls for ROFA's Tribune seating elements: a playful way to furnish a space. Tribune seating elements are an ingenious solution for reception areas in small spaces or for creating a meeting room with upholstered furniture.

The elements are fully upholstered, constructed from sustainably certified wood and cold foam. You can sit high or low, or even lounge against it.

This system is modular and easy to move around. You can also easily create a different configuration with it.

## Specifications
